

In response to popular demand Rainbow Reading has published a series of books, with CDs, specifically aimed at the interests of males (but which we know will also appeal to a lot of females).

This series is based on the research proven formula of Rainbow Reading but will not be readily identifiable to students as such.

Featuring:

- △ 20 titles with accompanying CDs read by young men
- △ Content that is humorous, risqué (wedgies, details of horrifying habits, a flying loo and a farting pen to name a few), informative and ToXic to engage and delight males!
- △ Fiction (including two in comic format) and non-fiction (in “chapters”)
- △ Main characters that are predominantly male doing “male things” to interest male readers
- △ The tried and true optional activities of Rainbow Reading AND “Make and Do” activities providing a need to read instructions
- △ Very high interest content with less emphasis on levelling but deemed suited to those with reading levels approx. 7 – 10 years
- △ Ideal for reluctant and struggling readers
- △ A perfect complement to Rainbow Reading
